Subject: API, hydraulic fracturing, Pavilion, Wyo.

Alisha,

Can I get a response to API's allegation today that the USGS testing data from Pavilion shows EPA used a flawed methodology in its Wyoming study - specifically with one of its test wells there – that could be replicated in the national study?

Also, is there any firm expected date – for scheduling purposes only – of the update we can expect on the multiyear study in December?

Thanks,
Jen.
